CR-500D	"Roll-A-Weigh" Wheelchair Scale, 500 lb Capacity	Wheelchair
CR-1000D	"Roll-A-Weigh" Wheelchair Scale, 1,000 lb Capacity	Wheelchair

Scale Connectivity Kits for the following Welch Allyn devices:

Welch Allyn Connex Spot Monitor

Welch Allyn Connex Vital Signs Monitors

Welch Allyn Connex Integrated Wall System

License Required
<p>No No license required. Connectivity kit must be purchased from DETECTO</p>
<p>Yes License key included with purchase of connectivity kit from DETECTO</p>
<p>Yes License key included with purchase of connectivity kit from DETECTO</p>

Important Notes Regarding Acquisition and Setup of Scale Connectivity:

- Welch Allyn will not sell scales or connectivity kits/licenses.
- Connex Vital Signs Monitors require software version 1.7 or later to access the scale connectivity feature.
- Connex Spot Monitors require software version 1.2 or later to access the scale connectivity feature.
- With Connex Vital Signs Monitors and Connex Integrated Wall Systems, scale connectivity feature must be activated on Welch Allyn device using the Welch Allyn Service Tool and a license key shipped with the connectivity kit.
- Connex Spot Monitor does not require a connectivity license.
- Connectivity license must be purchased through DETECTO.

Important Notes Regarding Function of Welch Allyn Devices with DETECTO Scales:

- **Select DETECTO Scales:** Measure weight, allow for manual entry or digital capture of height and calculate BMI.
- **Select DETECTO Scales:** Have the ability to transfer values for weight, height and BMI from a DETECTO digital scale to a Welch Allyn Device.
- **Connex Spot Monitors with 1.2 software and Connex Vital Signs Monitors with 1.7 software or greater:** Accept and display weight, height and BMI when transmitted from the scale. (Connex monitors do not calculate BMI.) The monitors also allow for manual entry of weight, height and/or BMI.

Important Note Regarding EMR Connectivity:

EMR connectivity requires existing Welch Allyn device interface built by the specific EMR vendor for customer's specific EMR product and release. This interface must include each specific category (height, weight, BMI) for that information to transfer.
