

Hillrom™

ADVANCING CONNECTED CARE™ WITH ECG CONNECTIVITY

Hillrom and Epiphany® Cardio Server

We're helping you improve clinical workflows and reduce manual documentation for ECG data by sending it right to your EMR. See how the Welch Allyn® Diagnostic Cardiology Suite™ ECG can help create a workflow that works best for your practice.

Unconnected Workflow

- 1 Order an ECG
- 2 Manually document patient demographics in the ECG software
- 3 Capture ECG and print test results for physician review
- 4 Add physician notes to ECG printout
- 5 Scan the ECG printout and import into the EMR
- 6 Add diagnosis in EMR
- 7 Complete order

Connected Workflow

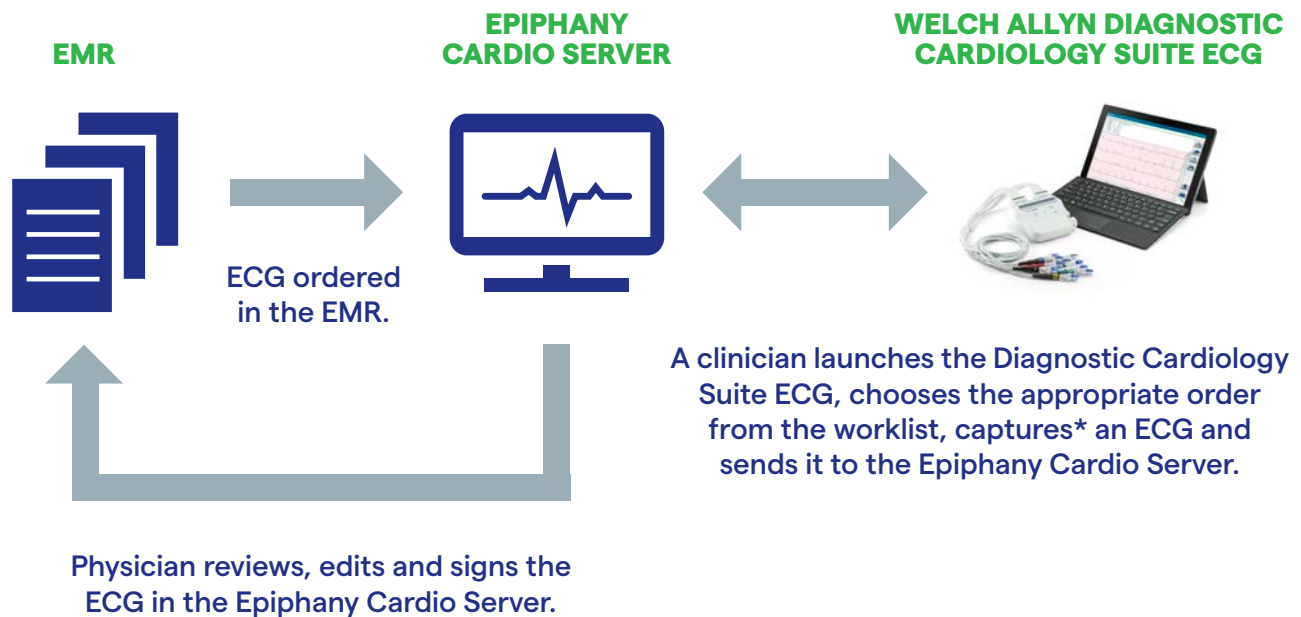

- 1 Order ECG in EMR
- 2 Launch Diagnostic Cardiology Suite ECG from the worklist
- 3 Capture ECG and send to Epiphany Cardio Server
- 4 Physician opens ECG in Epiphany Cardio Server to review, edit and sign
- 5 Image of the final ECG result and discrete data are automatically sent to the EMR

Connectivity Counts

Help save time and improve data accuracy by streamlining your clinical workflows.

- Save time previously spent manually entering data into the EMR
- Improve accuracy by automatically associating results with the EMR orders
- Work more efficiently by freeing up your time for other patient priorities

Automate your workflow with the Diagnostic Cardiology Suite by connecting directly to your EMR via Epiphany's Cardio Server.

Contact your Epiphany representative to learn more.
